

# **CODI**

CRAFT CANNING SYSTEM

COUNTER PRESSURE TECHNOLOGY

## **CCL-45 FILLER**

UP TO  
**55**  
CANS PER  
MINUTE  
\*12oz/355mL cans

**COMPLETE CONTROL THROUGHOUT  
THE FILL PROCESS** Limit oxygen absorption,  
reduce beer loss, and fill cans under a wider range  
of temperatures and carbonation levels.

# CCL-45 FILLER

AVAILABLE WITH 3 OR 6 FILL HEADS

## FILL SPEEDS\* 12oz cans

	3 Head	6 Head
<i>CPM</i>	30	55
<i>CPH</i>	1800	3300
<i>BBLs/hr</i>	5.5	10
<i>HLs/hr</i>	6.5	11.7
<i>Case/hr</i>	75	137

\*speeds under ideal conditions

## SPECIFICATIONS

**Dimensions** (L x W x H) 84" x 34" x 70" inches  
(2134 x 864 x 1778mm)

**Weight** 1300 lbs (590 kgs)

**Power** 208-240V, 3 phase, 50/60 Hz - 27Amps  
-OR-  
380-500V, 3 phase, 50/60Hz - 13 Amps (with upcharge)

**Air** 11CFM @110PSI

**CO<sub>2</sub>** 35lbs/10 Barrels of 12oz canned product

### COUNTER PRESSURE IS

**BETTER** Fill under a wider range of temperatures and carbonation levels while controlling flow, pressure, and release.

### CONSISTENT SEAMS

**EVERY TIME** Our all mechanical seamer is easy to adjust and maintains consistent seams for extended canning runs.

### EASY AND COMPLETE

**CLEANING** Stainless steel construction, wash down (3A) rated components, and bi-directional flow make cleaning quick and easy.

### KEY FEATURES

- 304 stainless steel construction compatible with steam, foam and caustic cleaning
- TACT style cleaning compatible with a closed CIP system for increased contact time
- 13" touchscreen HMI provides full control over fill rates, tank pressure, settle time, and snift rates
- Optional remote control of the filler from a phone or tablet
- Regulate and change purge cycles on the fly
- Built in buffer tank pressurizes liquid with CO<sub>2</sub> prior to filling to keep CO<sub>2</sub> in solution
- Post fill to seam foam management with controlled pressure release
- CO<sub>2</sub> monitoring throughout the fill process
- Audible and visual alerts
- Cam driven seaming operations for consistent seals every time
- Integrated sensors monitoring stacked lids/lid drop
- Widget can ready: control pre-purges and fill levels per the can maker requirements
- Quick adjustments between different can sizes
- Compact footprint with optional mobility

# UPGRADES & ACCESSORIES

## CO<sub>2</sub> PRE-PURGE

### Dissolved Oxygen Mitigation

- Dispenses CO<sub>2</sub> into empty cans immediately before entering the filler
- Prevents oxygen absorption
- Maximizes filler speed

## CO<sub>2</sub> TUNNEL

### Dissolved Oxygen Mitigation

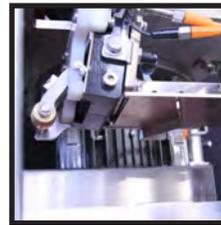

- Creates a CO<sub>2</sub> rich environment between the filler and seamer to keep oxygen out
- CO<sub>2</sub> cycles controlled from the filler HMI
- Flow rate is controlled manually by a valve

## FILL HEAD DRIP TRAY

### Dissolved Oxygen Mitigation

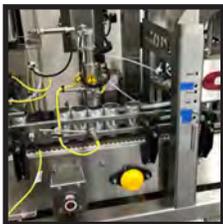

- Catch excess liquid left on fill heads to prevent oxygen absorption
- Slides under fill heads between cycles of cans

## CO<sub>2</sub> BLANKET

### Dissolved Oxygen Mitigation

- Dispenses CO<sub>2</sub> over the foam cap just before entering the seamer
- Prevents oxygen absorption

## NITRO DOSER

### Non Carbonated Beverages

- Jet liquid nitrogen into cans
- Displaces oxygen in head space
- Pressurizes cans for non-carbonated beverages

## FOAM JETTER

### Beverages with Dissipating Foam

- Injects small amount of hot water into beverage just before the seamer
- Forces foam cap formation
- Prevents oxygen absorption

## CHANGE PARTS

### Product Differentiation

- Add can sizes to your product lineup
- Fill different can sizes on one machine
- Standard, sleek, and slim change parts available

## 3-6 HEAD UPGRADE

### Increase Speed

- Grow your business
- Fill more cans faster
- Add 3 additional fill heads

## CE GUARDING

### Safety

- Full filler enclosure
- Protect operators from moving parts
- Required in many European countries

## LUBRICATION SYSTEM

### Increase Performance

- Recommended for shrink sleeve and matte finished cans for smooth can handling
- Dispenses lubricant on feed screws

## REMOTE ACCESS

### Increase Performance

- Control the filler from a phone or tablet with a downloadable app
- Gain freedom to move around the canning line while accessing all the same controls available through the HMI

## ROPP INTEGRATION

### Product Differentiation

- Fill bottle cans and feed an ROPP bottle capping system
- Bypass the seamer when filling ROPP cans
- Alternatively, the filler is available without a seamer for a reduced cost
